Description

ECCO Mine Bars are built and ready to go, so your vehicle can be on-site as quickly as possible. ECCO's new Mine Bar range is available with five beacon variations alongside a specifically designed anodised aluminium support bar with a center sealed cavity for wiring protection, ensuring these bars are robust by nature. Top and bottom rails provide flexible bar mounting options and allows easy attachment of accessories which makes these bars versatile by design. Additionally, as they're pre-built, we'll have stock ready for speedy delivery.

Applications

Vehicles, 4WDs and emergency services

All Mine Bars Include

Back Up Alarm (Part No. 127-001), Utility Bar Support Rail (Part No. MB-1200), Small Rear S/T/I/R Lights (Part No. MB-L01)

Anodised Aluminium Support Bar

- Specifically designed black anodised aluminium support bar
- Center sealed cavity for wiring protection
- Top and bottom rails provide flexible bar-mounting options and allows easy attachment of more brand accessories
- Plastic end caps standard, and rubber capping optional
- Front and rear indents provide option for custom inserts

Optional Mounting, Extra Brackets and Fittings

Support bar design also allows for flexible mounting options including direct to vehicle header boards and existing roof rack systems. Beacon plate design allows for attachment of a range of accessories including LED mining safety flags and radio aerials. Stainless steel fittings used for all attachments.
