

# Vision X Tremor 3, 5, and 8 LED Anti-glare

THB0608AG

## Description

### New - for Enhanced Performance

The Tremor Series now includes advanced anti-glare technology, which functions like a headlight with a sharp cutoff. This allows users, such as haul truck operators, to aim the light low enough to avoid blinding smaller vehicles, enhancing the safety of other drivers on the road. Additionally, the Tremor Series offers selective yellow options for improved visibility in foggy or low-contrast conditions, making it a top choice for professionals who require reliable lighting solutions in any environment.

### What are Anti-glare Optics?

Anti-glare optics for LED lighting in mining vehicles reduce direct light intensity, minimizing glare and enhancing visibility and safety by evenly scattering light.

## Features and Benefits

- Reduces glare for improved operator comfort
- Ensures even light distribution in harsh environments
- Enhances safety and visibility on mining vehicle
- Available in various lumens options

## Applications

Heavy equipment, construction, mining, support vehicles, agriculture
