

MACS Wheel Nut Retention System

MACS Designed Wheel Nut Retainer

Description

MACS Designed Wheel Nut Retainer

In response to concerns relating to wheel loss on light vehicles, MACS Engineering has developed an innovative solution to help prevent wheel loss occurring.

Features and Benefits

- Designed to reduce the risk of wheel nuts working loose and causing wheel loss
- Product tested by an independent testing laboratory
- 5 & 6 stud patterns to suit various OEM original steel rim wheels
- Ease of installation and removal.
- Now available for the New Ford PX Ranger, Toyota Hilux and Landcruiser, Nissan Patrol and Isuzu D-max.

Applications

Light commercial vehicles, off-road vehicles, mining vehicles, utility vehicles, fleet vehicles, 4WD vehicles, construction vehicles
